

Homeland Security

MEMORANDUM

DATE: May 23, 2014

TO: Commissioners Court

FROM: Kelley Stone
Director of Homeland Security

REF: Agreement for Donation of Inventory Software to MRC

We are requesting approval from the Collin County Commissioners Court to accept a donation of software for internal inventory management by the Medical Reserve Corps (MRC).

This software is owned by one of our MRC volunteers, and is typically used as inventory and fleet management software for local fire departments. In Collin County, this software is used by almost 50 fire departments, including Anna, Prosper, Fairview, Parker, Farmersville, Lowery Crossing, Wylie and Plano. The company is called Firecheckoffs.com and the software is web-based at this web address.

Our MRC volunteers would be able to use this software to track supplies, materiel, and equipment for deployments. This will allow the MRC to keep track of the location and quantity of supplies within our storage areas, but will also manage equipment checks and repairs (such as repairs to deployable amateur radio equipment).

There is no direct cost to Collin County for this software, and there will be no future maintenance costs for use of the software. There are no indirect or other costs to Collin County.

If you have any questions please give me a call.
